

BROOKS has facilitated spiritual leadership worldwide since 1986. His diverse knowledge combines psychology, sociology, economics, and multi-cultural forms of leadership from inside the nature of God. Brooks realized early in his life that to be God means taking responsibility for who you are without limitation.

At the age of 20, Brooks was diagnosed as legally blind. He recognized that his blindness was the result of hidden trauma and within three years, he taught himself how to see what it was he did not want to see. He has never worn glasses since. As a result, he developed vision that is capable of seeing inside the density of matter, the human body, the human spirit and beyond.

During his years as an international liaison for the US government and as a world corporate leader, Brooks acquired unique insights into the global benefits of feminine wisdom, a wisdom essential for the creation of a one-family planet. Brooks advocates for women leaders of the world with a balance of female and male authority in society so humanity can come into full partnership with Mother Earth.

Brooks knows how to change reality, not simply what is wanted, rather to actually create what can happen. He shows you how to recreate your reality into forms and structures that can radically alter the trajectory of society towards positive and compassionate abundance. Brooks helps you to open your inner perceptions and expand your possibilities from the realm of the ordinary into the alchemy of the infinite.

TANTRA OF BEAUTY

Releasing patterns of relationship passed down through ancestral trauma frees you to be in partnership based in co-creative autonomy. When you relate from autonomy, the clarity with which you reflect the beauty of others is a gift. Relationship, even in the details of everyday life, can be an ecstatic meeting of God honoring God in mutuality, trust and generosity. Accepting your uniqueness opens you to receive it in another and this allows the bliss of unitive consciousness. In unity, partnership becomes a creative dance for women and men to transform the world together.

GOD PSYCHOLOGY

We are God. No life exists other than our creation and no other God could create it for us. In God Psychology we bring back into unity scattered pieces of ourselves: our body, soul, psyche, ego, mind. We discover the power, freedom and joy of being who we are as whole, complete and unique. We call this genius - awareness of the fact that one holds full responsibility for every aspect of one's life, that one actually is her/his life and therefore real, whole life becomes a process of conscious creation. Opportunity for relationship becomes unlimited - in God, nature, business, intimacy, community, society. World unity will happen from this place, wealth and abundance will happen from this place. It simply comes down to: just be who you are.

HOMECOMING

Homecoming -- return to your roots, roots of the Earth. As the human animal we have lost our roots, our rhythm as creatures of the planet and we've become identified with our creations: buildings, technology, possessions, power. We view "nature" from a tram or TV or grandstand or motor home as something outside ourselves sterile and convenient, something to be conquered and dominated. Journey homeward now to the nature within you, the nature of who you are as animal: your instinct, your rhythms, your uniqueness. Journey into the non-verbal, non-linear world of nature where all is felt, sensed and known. A journey where all life is revered, all is balanced and all uniqueness is experienced as wildness in its sacred intention.

UNITY OF NATURE

Rejoin the unity of Nature. We have separated from each other and from ourselves. Through reunifying ourselves we reunite with our family of cultures, Mother Earth and her Nature. By finding ourselves through collaborating with each other, with our unique cultures and with Nature, we will meet our individual and collective longings for support, safety, nurturing, joy, and love that we have experienced through millennia of separation. Regain your freedom and the joy of participating autonomously and responsibly with other human and natural cultures without the fear and trauma which impedes your collaborative impulse today. Reclaim your natural balance and flow which is developed through mutual collaboration with other cultures, creating rich opportunities beyond your capacity to imagine.

Art of God

SOCIETY'S NATURE

THE ART OF BEING
NATURALLY GOD

ONE FAMILY WORLD
IS NURTURED INTO REALITY
THROUGH FEMININE
WISDOM
BALANCE IS ACHIEVED
WHEN WOMEN
AND MEN
ENJOY THEIR OWN
AUTHORITY AS
WHO THEY
ARE
UNIQUELY
IN GOD.

ART OF BEING GOD

The art of being God is simply taking responsibility for creating reality for yourself that affects everyone. When you can do this with humility, love and graciousness, others feel safe and honored by you. Then you are God, as is God's choice, and you further your evolution as well as everyone else's.

Once you can accept this invitation with confidence, you become an Artist of God. When you can trust in your capacity to create reality and become a leader of the 21st century, you'll experience a degree of support beyond what's normally considered possible. This is God's investment in you as an opportunity of evolution.

MOTHER AND FATHER OF GOD

Your life becomes that of a star, prominent in society and recognized as extraordinary by others. Once you accept this you'll experience a level of consciousness that allows you to gently support people in making difficult transitions, which would be too challenging if they didn't feel safe. This is the beauty and genius of motherhood and fatherhood, known as Ma and Ba (mother and father of God).

The opportunity of evolving as Ma and Ba is the discovery of a limitless nature of God. There are only endless openings for your creation, fun and beauty. This freedom is an invitation from God to be seen, to be prominent, to shift reality from what is considered "normal" about the real nature of God.

ADVANCED PRIORITIES OF EARTH AND GOD

Women are meant to run a family planet, as the nature of Ma is nurturing. The nature of Ba is supportive and protective. Those two qualities, when in balance, optimize the opportunity of evolution. This balance will be achieved once women and men are comfortable with their authority and the opportunity of being uniquely who they are, and enjoy the art of being God.
